- [UiPath vs Blue Prism](#)

"You can scrape data into your tables, then easily transform it or convert it between formats."

"The highest benefit of it is that it's just there, ready to use, and you don't need to start from a blank screen."

## 2. Automation Anywhere (AA)

### Popular Comparisons

- [Automation Anywhere \(AA\) vs Blue Prism](#)

"The ease of use for the end user and the very low complexity in trying to build a bot are the big factors for us. We are able to work on a project, identify a use case, come up with a design spec, and execute and build a bot within a span of six to eight weeks. In nine to ten weeks, we are able to go live, which reduced complexity. Once we go live, the user interface and the user experience are extremely good."

## 3. Blue Prism

### Popular Comparisons

- [Blue Prism vs UiPath](#)
- [Blue Prism vs Automation Anywhere \(AA\)](#)

"The development interface is quite easy to work with."

"Blue Prism is very good at doing background processing."
